THE SOFTWARE WITH PERSONAL ADVICE FROM STANDARDS SPECIALISTS

Standards are complex and not always easy to understand. Leave the complex activities related to the procurement and monitoring of the individual regulations to our software GLOBALnorm so that you can concentrate entirely on the interpretation.

BENEFITS

- | Save resources and effort in standards management and regulation tracking
- | Benefit from measurable cost savings through our publisher-neutral procurement
- | Receive expert-verified CE information from the EU Official Journal automatically
- | Reduce the liability risk for your company through increased process security
- | In short: Ensure the long-term competitiveness of your company

STANDARDS TODO'S

- Know
- Research
- Procure and license
- Store and manage centrally
- Read and understand
- Apply correctly
- Document
- Monitor and keep up to date

Simply
done thanks to
GLOBALnorm

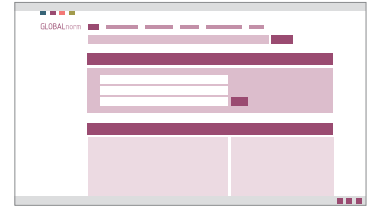

By the way: Even with unchecked tasks the experts of GLOBALNORM STANDARDS can support you!

3 STEPS TO EFFICIENT STANDARDS MANAGEMENT

1. SOFTWARE AS A SERVICE

Secure access to a centrally maintained online standards database anytime and anywhere – even at several locations worldwide | Prominent **search field with intelligent search settings** for precise results even without a lot of prior knowledge | **Full text search** in the standards stock | **Automatic monitoring** of standards | Current **publication status**, even for **harmonized standards**, can be recognized at a glance thanks to user-friendly icons | And many other functions ...

2. METADATA

Provision of the externally licensed metadata from **various publishers** and sources directly in GLOBALnorm **including procurement of the licenses** | basic data packet "Standards" with over 2.35 million data records from various international regulations such as ANSI, CSA, DIN, EN, IEC, ISO, UL | Additional data packets and more ...

Only
with us

The non-transparent publication policy on harmonized standards of the EU Commission is presented for you in a comprehensible way by our **basic data package "CE Special"** and ensures the legally compliant design of your EU declarations of conformity. This helps you to reduce the liability risk for your company!

3. FULL TEXT

Order **full-text documents** directly from the GLOBALnorm software and have them **made available** to all users | We procure the necessary licenses, **independent of the publisher**, with **measurable cost savings** | **Automatic provision** of regular updates of your subscribed standards by external publishers | **Import of the existing full text inventory** as well as own company standards possible | And much more...

IT'S TIME FOR A NEW STANDARDS MANAGEMENT SYSTEM

In just four weeks, our experienced team can implement our GLOBALnorm software for your company.

We support you in advance with our wealth of experience and independent advice on the way from decision-making to the selection of the range of functions and content that suits your requirements.
